

Situation plan on ortho photo

## 25,11 METER LONG MOUNTAIN HOUSE

The house has taken inspiration of the 1920's New Orleans shotgun houses. The width of these buildings rarely stretched more than 3,5 meters. Rooms were placed directly in front of each other. When all doors were opened a sightline appeared thru the complete building and a person could fire a shotgun through the front door, through all rooms and out the backdoor.

Far away, where the road ends, high up on east side of Jämtlands mountains, the house will be hidden among tiny birch- and spruce trees. Finished floor height will be at 806 meter above the sea level and offer a fantastic opportunity to observe the nordic lights. The main building can be compared to a stretched out old fashioned duo house or to multiple grain huts placed in a line next to eachother.

Just as traditional houses the framework and facade are made with massive horizontal logs. Corners are bind together using a modern dovetail knot. Exterior walls and interior walls are the same and create a coherent structure. The outside facade will be left untreated to allow the sun to over time burn in a dark colour. As a contrast window- and doorframes will be painted black.

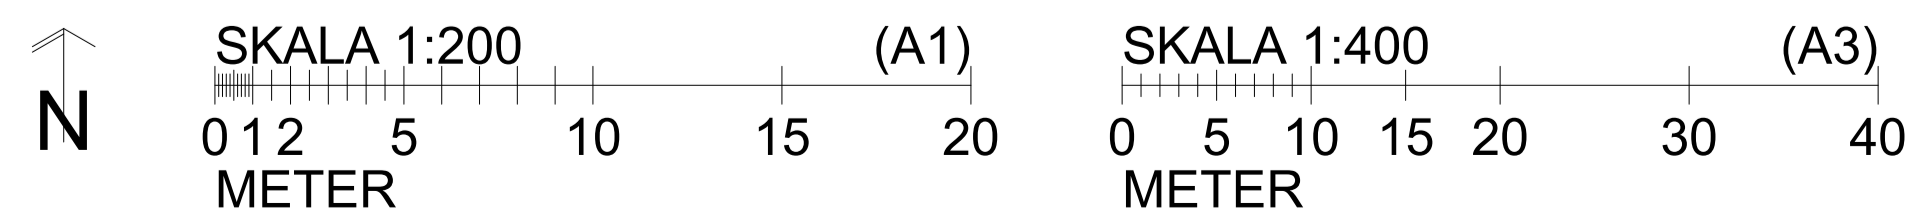

To avoid heavy groundwork and removal of vegetation and trees the building will be placed on a raised foundation standing on big earth screws. To further narrow the buildings proportions the foundation will be raised on clad wooden pilars.

The visitor follows a gravel path which goes thru big spruce trees and smaller birches. Behind the tress the house is revealed and appears raised from the ground with an attached staircase. a staircase like those in front of airplanes starts the adventure that awaits inside the house.

All rooms are placed in sequence with three bigger social rooms. In the south is the kitchen. In the middle the sauna and relaxation room with wc, shower and laundry. Directly outside is a deck area with the sun shining in from south and west. Furthest to the north, next to the foyer stands the heart of the house, a pellet stove and living room. Between the living room and relaxation area are three bedrooms, all rooms have a fantastic mountain and forest view.

The ambition is to use as few and as natural building materials as possible. Materials that are simple to build with, repair and to re-use. The whole house should be possible to raise without big machines and expertise knowledge. Simplicity is the key concept, all the way with choosing materials, execution and placement.

The goal is to have a building that is perceived as a narrow body that have been placed just where there is enough space between the trees. To allow for it to be hidden among the tiny birches and spruces high up on the mountain side.

## DESCRIPTION

**Foundation**  
 Double 45x220 mm C24 wooden joist on pillars standing on metal screwplinth  
 Subflooring insulated with woodenfiber 220 mm and 22 mm wooden board

**Wooden deck**  
 34 mm planks, 45x170/220 mm C24 wooden joist on pillars standing on metal screwplinth

**Roofing**  
 Corrugated sheets black 015 on roof trusses 30° with black tin details. Insulated with woodenfiber 45+145+170 mm, Ceiling 25 mm woodfiber/concrete panel

**Exterior and interior walls**  
 Massive logs 140x170 mm, dovetail corners, interior walls 100x170 mm dovetailed in exterior wall, expansion slats on long wall for stabilization. Installation wall slides on logwall, plywood 12 mm + studs 95/120/145 mm + plywood 12 mm + plasterboard 13 mm, wall in shower and toilet clad with Tarkett iQ Natural 21103 081

**Flooring**  
 In kitchen, foyer, laundry, wc, relax and sauna subfloor clad with particle board with sloop towards floodrain, floor clad with Tarkett iQ Natural 21103 081. In bedrooms, hallway and living sufloor clad with 25x135 mm tongue and groove spruce planks screwed into floor joists

**Windows**  
 Pine in softline style 2-panes 126 mm frame depth, black inside and black aluminium outside

**Doors**  
 Interior doors pine frame and oiled plywood. Exterior doors black inside and black aluminium outside

**Kitchen/laundry cabinets and other bespoke furniture**  
 Carpentry in spruce, pine or painted matt black

**Technical installations**  
 5 liter water heater in kitchen/toilet and laundry, 30 liter water heater in shower. Orbital Shower circular shower Retrofit matt black. PAX Levante 50 black exhaust fan in shower, kitchen exhaust fan over stove. Composting toilet with composting chamber and urin collection below house, composting toilet ventilated above roof. Heated by pellet fireplace in living room and electrical radiators Adax Neo Wi-Fi. Electrical wiring in subflooring and visible cables pinned to wall/ceiling with white brackets, outlets in black/white renova

Buildingarea (BYA) 90,38 m<sup>2</sup> Livingarea (BOA) 82,15 m<sup>2</sup>

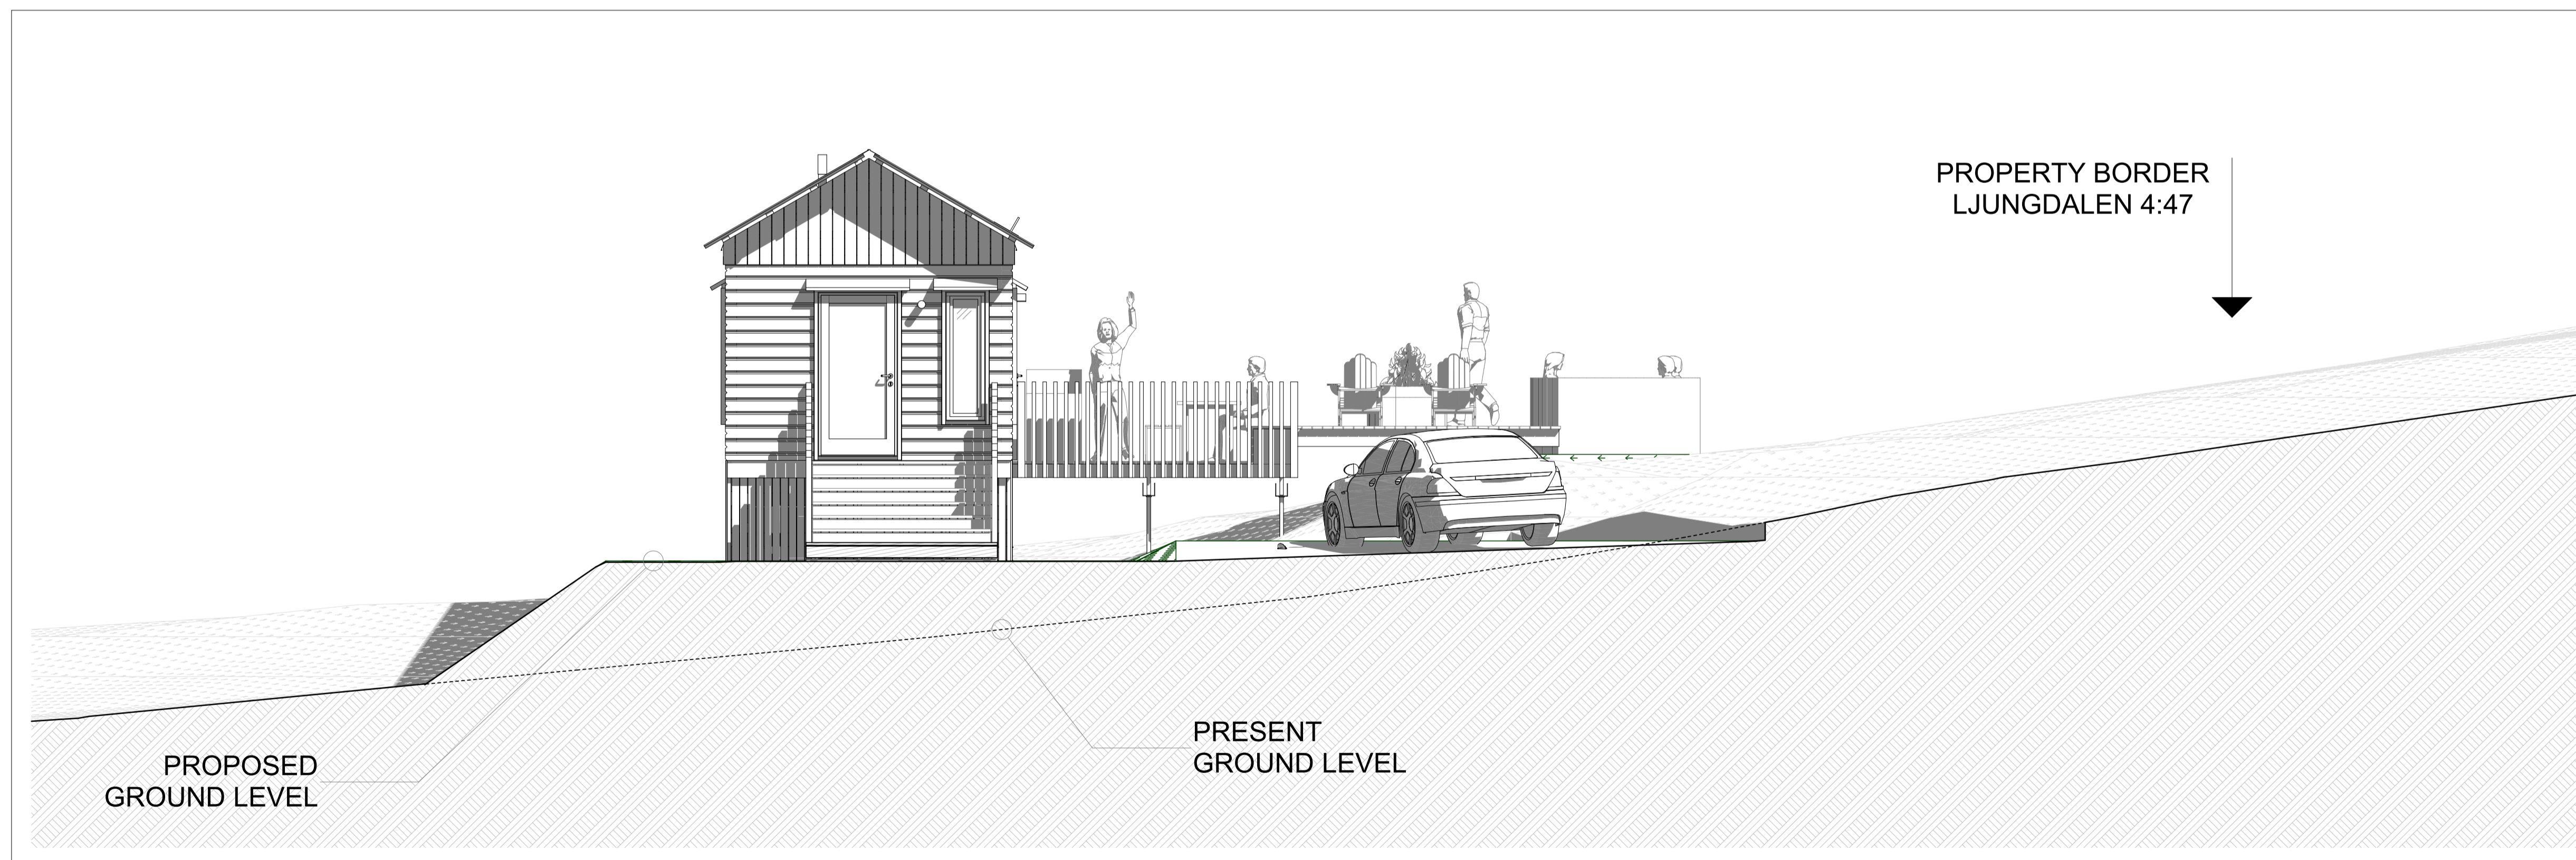

All measurements in millimeter  
 All measurements cc of logwalls (same as systemlines)
